Cyber Attack Thought to Originate in Russia

A massive cyber attack targeting a European country slowed some global Internet traffic to a crawl, launched by a gang of hackers from Russia, says the head of a Russian firm specializing in cyber attacks.

By Lukas I. Alpert

MOSCOW—A massive cyber attack targeting a European country slowed some global Internet traffic to a crawl, launched by a gang of hackers from Russia, says the head of a Russian firm specializing in cyber attacks.

Alexander Lyamin, of Moscow's Highgate Group, says the same group who have caused trouble against the non-profit Spamhaus Project series of brief strikes on several top European countries, says the head of a Russian firm specializing in cyber attacks.

Executive Order -- Improving Critical Infrastructure Cybersecurity

EXECUTIVE ORDER

IMPROVING CRITICAL INFRASTRUCTURE CYBERSECURITY

By the authority vested in me as President by the Constitution and the laws of the United States, I hereby ordered as follows:

Section 1. Policy. Repeated cyber intrusions into critical infrastructure demonstrate the need for improved cybersecurity. The cyber threat to critical infrastructure continues to grow and represents one of our nation's most serious security challenges we must confront. The national and economic security of the United States depends on the reliable functioning of the Nation's critical infrastructure in the face of such threats. It is the policy of the United States to enhance the security and resilience of the Nation's critical infrastructure and environment that encourages efficiency, innovation, and economic prosperity while promoting business confidentiality, privacy, and civil liberties. We can achieve these goals through a partnership between the owners and operators of critical infrastructure to improve cybersecurity information sharing and to develop and implement risk-based standards.
